

Articles:

Numerical Generalized Randomized HMC Processes for Restricted Domains. *Statistics and Computing* (2025), 35(4): 1573-1375 (with T.S. Kleppe), <https://doi.org/10.1007/s11222-025-10637-3>.

Analyzing Commodity Futures Using Factor State-Space Models with Wishart Stochastic Volatility. *Econometrics and Statistics* (2022), 23: 105-127 (with T.S. Kleppe, G.V. Moura, A. Oglend), <https://doi.org/10.1016/j.ecosta.2021.03.008>.

Predicting the Global Minimum Variance Portfolio. *Journal of Business & Economic Statistics* (2021), 41(2): 440–452 (with L. Reh, F. Krüger), <https://doi.org/10.1080/07350015.2022.2035226>.

Importance Sampling-Based Transport Map Hamiltonian Monte Carlo for Bayesian Hierarchical Models. *Journal of Computational and Graphical Statistics* (2021), 30(4): 906–919 (with K.K. Osmundsen, T.S. Kleppe), <https://doi.org/10.1080/10618600.2021.1923519>.

Estimating the Competitive Storage Model with Stochastic Trends in Commodity Prices. *Econometrics* (2021), 9(4): (with K.K. Osmundsen, T.S. Kleppe, A. Oglend), <https://doi.org/10.3390/econometrics9040040>.

Factor State-space Models for High-dimensional Realized Covariance Matrices of Asset Returns. *Journal of Empirical Finance* (2020), 55: 1-20 (with J.P. Hartkopf, B. Gribisch), <https://doi.org/10.1016/j.jempfin.2019.08.003>.

The Gibbs Sampler with Particle Efficient Importance Sampling for State-space Models. *Econometric Reviews* (2018), 38(10): 1152–1175 (with O. Grothe, T.S. Kleppe), <https://doi.org/10.1080/07474938.2018.1536098>.

Likelihood Based Inference and Prediction in Spatio-Temporal Panel Count Models for Urban Crimes. *Journal of Applied Econometrics* (2017), 32(3): 600-620 (with J.F. Richard, J. Vogler), <https://doi.org/10.1002/jae.2534>.

Likelihood Evaluation of High-Dimensional Spatial Latent Gaussian Models with Non-Gaussian Response Variables. *Advances in Econometrics* (2016), 37: 35-77 (with J.F. Richard, J. Vogler), <https://doi.org/10.1108/S0731-905320160000037009>. MATLAB Codes: Likeli_EIS_Probit_Code, Likeli_EIS_Poisson_Code.

Intra-Daily Volatility Spillovers in International Stock Markets. *Journal of International Money and Finance* (2015), 53: 9-114 (with V. Golosnoy, B. Gribisch), <https://doi.org/10.1016/j.jimonfin.2015.01.002>.

Efficient Importance Sampling in Mixture Frameworks. *Computational Statistics and Data Analysis* (2014), 76: 449-463 (with T.S. Kleppe), <https://doi.org/10.1016/j.csda.2013.01.025>.

Efficient Likelihood Evaluation of State-Space Representations. *The Review of Economic Studies* (2013), 80(2): 538-567 (with D.N. DeJong, H. Dharmarajan, G.V. Moura, J.F. Richard), <https://doi.org/10.1093/restud/rds040>.

The Conditional Autoregressive Wishart Model for Multivariate Stock Market Volatility. *Journal of Econometrics* (2012), 167(1): 211-223 (with V. Golosnoy, B. Gribisch), <https://doi.org/10.1016/j.jeconom.2011.11.004>.

Dynamic Factor Models for Multivariate Count Data: An Application to Stock Market Trading Activity. *Journal of Business & Economic Statistics* (2011), 29(1): 73-85 (with R.C. Jung, J.-F. Richard), <https://doi.org/10.1198/jbes.2009.08212>.

Interval Shrinkage Estimators, *Journal of Applied Statistics* (2011), 38(3): 465-477 (with V. Golosnoy), <https://doi.org/10.1080/02664760903456434>.

Classical and Bayesian Analysis of a Probit Panel Data Model with Unobserved Individual Heterogeneity and Autocorrelated Errors. *International Journal of Statistics and Management Systems* (2011), 6: 1-21 (with M. Burda und J.-F. Richard).

Efficient Estimation of Probit Models with Correlated Errors. *Journal of Econometrics* (2010), 156(2): 367-376 (with J.-F. Richard), <https://doi.org/10.1016/j.jeconom.2009.11.006>.

Determinants and Dynamics of Current Account Reversals: An Empirical Analysis. *Oxford Bulletin of Economics and Statistics* (2010), 72(4): 486-517 (with G.V. Moura, J.-F. Richard), <https://doi.org/10.1111/j.1468-0084.2010.00588.x>.

Dynamic Invariant Multinomial Probit Model: Identification, Pretesting and Estimation. *Journal of Econometrics* (2010), 155(2): 117-127 (with J.-F. Richard), <https://doi.org/10.1016/j.jeconom.2009.09.021>.

The Decline in German Output Volatility: A Bayesian Analysis. *Empirical Economics* (2008), 37: 653-679 (with C. Aßmann, J. Högrefe), <https://doi.org/10.1007/s00181-008-0251-9>.

Improving MCMC Using Efficient Importance Sampling. *Computational Statistics and Data Analysis* (2008), 53(2): 272-288 (with J.-F. Richard), <https://doi.org/10.1016/j.csda.2008.07.028>.

Simulation Techniques for Panels: Efficient Importance Sampling. In: Mátyás, L., Servestre, P. (Eds.), *The Econometrics of Panel Data: Handbook of the Theory*. Kluwer, Boston, (2008), 419-450 (with J.-F. Richard), https://doi.org/10.1007/978-3-540-75892-1_13.

Time Series of Count Data: Modelling and Estimation. *Computational Statistics and Data Analysis* (2006), 51(4): 2350-2364 (with R.C. Jung, M. Kukuk), <https://doi.org/10.1016/j.csda.2006.08.001>.

Classical and Bayesian Analysis of Univariate and Multivariate Stochastic Volatility Models. *Econometric Reviews* (2006), 25(2-3): 335-360 (with J.-F. Richard), <https://doi.org/10.1080/07474930600713424>.

Modelling Financial Transaction Price Movements: A Dynamic Integer Count Data Model. *Empirical Economics* (2006), 30: 795-825 (with I. Nolte, W. Pohlmeier), <https://doi.org/10.1007/s00181-005-0001-1>. Reprinted in: Bauwens, L., Pohlmeier, W., Veredas D. (eds.), *High Frequency Financial Econometrics*, Physikal-Verlag, Heidelberg, (2008), 167-197, https://doi.org/10.1007/978-3-7908-1992-2_8.

Timing Structural Change: A Conditional Probabilistic Approach. *Journal of Applied Econometrics* (2006), 21(2): 175-190 (with D.N. DeJong, J.F. Richard), <https://doi.org/10.1002/jae.821>.

A Nonlinear Forecasting Model of GDP Growth. *The Review of Economics and Statistics* (2005), 87(4): 697-708 (with D.N. DeJong, J.-F. Richard), <https://doi.org/10.1162/003465305775098152>.

The Estimation of Dynamic Bivariate Mixture Models: Comments on Watanabe (2000). *Journal of Business & Economic Statistics* (2003), 21(4): 570-576 (with J.-F. Richard), <https://doi.org/10.1198/073500103288619287>.

Univariate and Multivariate Stochastic Volatility Models: Estimation and Diagnostics. *Journal of Empirical Finance* (2003), 10(4): 505-531 (with J.-F. Richard), [https://doi.org/10.1016/S0927-5398\(02\)00072-5](https://doi.org/10.1016/S0927-5398(02)00072-5).

Comment on M. Lechner: 'Mikroökonomische Evaluation arbeitsmarktpolitischer Maßnahmen'. In Franz, W., Ramser, H.J., Stadler, M. (eds.), *Empirische Wirtschaftsforschung: Methoden und Anwendungen*. Wirtschaftswissenschaftliches Seminar Ottobeuren, Vol 32, Mohr Siebeck, Tübingen, (2002).

Ein dynamisches Hürdenmodell für Transaktionspreisänderungen auf Finanzmärkten. In Franz, W., Ramser, H.J., Stadler, M. (eds.), *Empirische Wirtschaftsforschung: Methoden und Anwendungen*. Wirtschaftswissenschaftliches Seminar Ottobeuren, Vol 32, Mohr Siebeck, Tübingen, (2002), 153-177 (with W. Pohlmeier).

Monte Carlo Methods and Bayesian Computation: Importance Sampling. In N.J. Smelser, P.B. Baltes (eds.), *International Encyclopedia of the Social Behavioral Sciences*. Elsevier Science, Oxford, (2001), 9999-10004 (with J.-F. Richard), <https://doi.org/10.1016/B978-0-08-097086-8.42148-3>.

Estimating Time Series Models for Count Data Using Efficient Importance Sampling. *Allgemeines Statistisches Archiv* (2001), 85(4): 387-407 (with R.C. Jung).

A Generalized Bivariate Mixture Model for Stock Price Volatility and Trading Volume. *Journal of Econometrics* (2001), 104(1): 141-178, [https://doi.org/10.1016/S0304-4076\(01\)00062-8](https://doi.org/10.1016/S0304-4076(01)00062-8).

Stochastic Volatility Models: Conditional Normality versus Heavy-Tailed Distributions. *Journal of Applied Econometrics* (2000), 15(2): 137-160 (with R.C. Jung).

Comment on H. Chiente: 'Volume and Nonlinear Dynamics of Stock Returns'. *Statistical Papers* (2000), 41: 119.

Simulation Based Method of Moments. In: Mátyás, L. (ed.) *Generalized Method of Moments Estimation*. Cambridge University Press, Cambridge, (1999), 275-300 (with J. Breitung), <https://doi.org/10.1017/CBO9780511625848.011>.

Dynamic Bivariate Mixture Models: Modeling the Behavior of Prices and Trading Volume. *Journal of Business & Economic Statistics* (1998), 16(1): 101-109, <https://doi.org/10.2307/1392020>.

Testing the Bivariate Mixture Hypothesis Using German Stock Market Data. *European Financial Management* (1996), 2(3): 273-297 (with R.C. Jung), <https://doi.org/10.1111/j.1468-036X.1996.tb00044.x>.

Working Papers:

Average Prices. University of Stavanger (with A. Oglend, T.S. Kleppe).

A Time-Varying Parameter Model with Bayesian Shrinkage for Global Minimum Variance Portfolio Prediction. University of Cologne (with L. Reh, G.V. Moura).

Pseudo-Marginal Hamiltonian Monte Carlo with Efficient Importance Sampling. University of Stavanger (with K.K. Osmundsen, T.S. Kleppe), Available at SSRN: <https://ssrn.com/abstract=3304077> or <http://dx.doi.org/10.2139/ssrn.3304077>.

Efficient Filtering in State-Space Representations. University of Pittsburgh (with D.N. DeJong, H. Dharmarajan, J.-F. Richard), Available at SSRN: <https://ssrn.com/abstract=1337092> or <http://dx.doi.org/10.2139/ssrn.1337092>.

Exploiting Non-Linearities in GDP Growth for Forecasting and Anticipating Turning Points. University of Pittsburgh (with D.N. DeJong, H. Dharmarajan, J.-F. Richard).

On the Structural Stability of U.S. GDP. University of Pittsburgh (with D.N. DeJong, H. Dharmarajan, J.-F. Richard), Available at SSRN: <https://ssrn.com/abstract=428664> or <http://dx.doi.org/10.2139/ssrn.428664>.

Trading Volume and the Short and Long-run Components of Volatility. University of Tübingen, Available at: <https://hdl.handle.net/10419/104956>.

Identifying Common Long-Range Dependence in Volume and Volatility Using High-Frequency Data. University of Tübingen, Available at SSRN: <https://ssrn.com/abstract=326300> or <http://dx.doi.org/10.2139/ssrn.326300>.

Books:

Preise und Handelsvolumina auf Finanzmärkten: Eine empirische Überprüfung der Mischungsverteilungshypothese. (1998), Gabler, Wiesbaden, (Dissertation), <https://doi.org/10.1007/978-3-663-08867-7>.
